

New Research on Bipolar Disorder

Image was collected by O. Alekseyenko using confocal microscope (Fluoview 1000, Olympus) at Neurobiology Imaging Facility.

12:45 Lunch | 1:00 Lectures | 5:00 Reception

**Thursday April 12, 2018
Armenise Amphitheater
Harvard Medical School
210 Longwood Ave, Boston**

Olga Alekseyenko, PhD
Brain serotonergic subsystems
and affective behavior in mice

Andrew Nierenberg, MD
Clinical overview of bipolar disorder

Justin Baker, MD, PhD
Longitudinal deep phenotyping
of bipolar disorder

Jordan Smoller, MD, ScD
Insights into the genetic basis of
bipolar disorder

Chinfai Chen, MD, PhD
The role corticothalamic circuits
play during development

Hisashi Umemori, MD, PhD
Molecular codes for parallel cortico-basal
ganglia circuits

The Harvard Brain Science Initiative and the Dauten Family Center for Bipolar Treatment Innovation gratefully acknowledge generous support from Kent and Liz Dauten.
