

Development, Degeneration, and Regeneration of Cerebral Cortex Projection Neurons: from Molecular Control of Subtype Diversity to Subtype-Specific, Autonomous Growth Cone Molecular Machinery

Jeffrey Macklis, MD

Max and Anne Wien Professor of Life Sciences, Department of Stem Cell and Regenerative Biology and Center for Brain Science, Harvard University

Professor of Neurology and of Neurosurgery, Harvard Medical School

Developmental &
Regenerative
Biology Program

**Student Data Club &
Faculty Seminar Series**

**Monday, February 12th, 4-5pm
New Research Building Room 350**

Followed by Social/Happy Hour

Deciphering the role of reptin in driving zebrafish cardiomyocyte proliferation

Michka Sharpe

BBS G5

Laboratory of Dr. Caroline Burns and Dr. Geoffrey Burns
