

Human iPSC Derivation and Culture

Wednesday through Friday, June 3-5, 2015

Register now at:

<https://hsci.formstack.com/forms/untitled-form4>

**Learn current reprogramming techniques
with this three-day, hands-on course**

Topics include:

- ◆ Hands-on technical training in current reprogramming methodologies
- ◆ Presentation of Sendai virus, episomal vector and mRNA reprogramming
- ◆ Characterization methods for reprogrammed cells
- ◆ Maintaining PSCs on feeder free culture
- ◆ Evaluation of PSC cell quality and passaging
- ◆ Banking and Cryopreservation

Workshop cost is:

**\$1200 for HSCI members | \$1500 for other, non-HSCI academic institutions |
\$2200 for industry/commercial participants**

This course is held at the HSCI iPSC Core on the Harvard campus in
Cambridge, Massachusetts ~ directions and instructions will be sent to confirmed participants.

This program is offered with the generous support of our industry partners at:
