Where the world comes for answers

Publishing with the EMBO Journal

Kelly Anderson, PhD
Scientific Editor at EMBO Journal

June 15 10-11am

Location:
Karp 6 Conference Room and
Zoom link

Password: 128062

Webinar ID: 994 9998 5544

Bio: Prior to graduate school, Kelly studied the genetics of mammalian circadian biology in the lab of Joseph Takahashi. Kelly received her PhD from the University of Texas Southwestern Medical Center, where she generated mouse models using gene editing technology to investigate cardiovascular long noncoding RNAs in the lab of Eric Olson. Kelly continued to study micropeptide regulators of heart function and disease in the group of Douglas Anderson at the University of Rochester, and additionally worked on novel CRISPR tools to manipulate RNA for the treatment of toxic RNA diseases. Kelly joined as US editor of The EMBO Journal in 2021.

This event is open to all career levels!
