

The Program in Genetics and Genomics Annual Symposium

featuring the research of past and current students

**Goldenson, Room 122
Monday, November 3, 2014
2:00 – 5:30 p.m.**

*Poster session with wine and cheese to follow
in the Courtyard Café, Armenise Building*

Open to the public - All are welcome!

Speakers

Dion Dickman, University of Southern California

"A forward genetic screen using electrophysiology identifies synaptic plasticity mutants and links with neuropsychiatric disease"

Aswin Sekar, McCarroll Laboratory, HMS

"A natural allelic series of complex structural variants in lupus and schizophrenia"

Daniel Holoch, Moazed Laboratory, HMS

"Small RNA loading licenses Argonaute for assembly into a transcriptional silencing complex"

Aimée Dudley, Pacific Northwest Diabetes Research Institute

"Natural variation and the regulation of biofilm formation in yeast"

Rachel Dutton, Harvard University

"Deconstructing and reconstructing microbial communities using cheese"
